Additional information

Role and responsibilities – may include reference to: preventing cross infection, the need for recording incidents and actions, safe use of available equipment, assessing an incident, summoning assistance, prioritising treatment, dealing with post incident stress.

Others may include a casualty receiving first aid, work colleagues, other people within the workplace environment.

Consent - learners should be aware of the need for consent on a continual basis when providing first aid. Implied consent can be assumed when treating an unresponsive casualty.

When necessary – learners should be able to evaluate a situation to determine when to summon further assistance and what type of assistance to request.

When to administer cardiopulmonary resuscitation – must include agonal gasps.

CPR must include 'correct placement of AED pads' and 'follows AED instructions'.

Recovery position – a position that maintains a stable open draining airway.

Administer first aid – provide appropriate help to a casualty, manage the situation and seek appropriate assistance when necessary.

Seizure – relates to a generalised seizure. *First aiders should be suspicious of cardiac arrest in any casualty presenting with seizure.*

Shock – hypovolaemic shock (resulting from blood loss).
